

HEDIS® MEASURE: CHILDHOOD IMMUNIZATIONS

Gold Coast Health Plan's goal is to help its providers gain compliance with their annual Healthcare Effectiveness Data and Information Set (HEDIS®) scores by providing guidance and resources. This tip sheet will provide the key components to the HEDIS® measure, "Childhood Immunization Status (CIS)."

Measure Description: Children 2 years of age and under who completed their childhood immunizations before turning 2 in the measurement year.

Ways to improve your overall HEDIS® score:

- ▶ Ensure your documentation is clear and concise.
- ▶ Use proper coding.
- ▶ Be sure to document in the medical record the name of the specific antigen and the date of the immunization.
- ▶ For documented history of illness or a seropositive test result, there must be a note indicating the date of the event, which must have occurred by the child’s second birthday.
- ▶ Document all seropositive and illnesses of chicken pox, measles, mumps and rubella.

The medical record must include:

- ▶ A note indicating the name of the specific antigen and the date of the immunization; or
- ▶ A certificate of immunization prepared by an authorized health care provider or agency that includes specific dates and types of immunizations administered.

Effective January 1, 2014, NCQA replaced the coding tables with “value sets” which contain all applicable codes that can be used to identify a specific service or condition included in any measure. Detailed information on the data sets and technical specifications can be found here.
